Spelling Rules, Definitions and Resources

Cost: \$27.50 (incl. GST) + Postage

Do you really know the rules that underpin the dozens of decisions you make when you spell words in daily life? Do you know what the difference is between homographs and homophones? What is the rule for doubling a final consonant before adding a suffix? Where can you get a comprehensive list of homophones to use in class?

These are some of the many questions I set about answering when writing this book. This comprehensive publication, developed over 30+ years of teaching contains the common spelling rules; definitions for the many terms that pop up in association with the teaching and learning of spelling; and a terrific resource section containing dozens of prefixes, suffixes, Greek and Latin roots and much more.

Here are the areas covered:
